

### Ordering Provider Workflow (Finding Radiology Reports)

1. Search for the patient you are looking for results on via VueMotion (PACS Web Viewer) <https://nwpacsweb.northwell.edu>
2. VueMotion search results only show the most recent exam for the patient. To view ALL imaging for a patient you must double click them to open their jacket.
3. The “Report” column indicates if the most recent exam had a report added to the study. This can be a helpful indicator in determining if a result is ready for a study.

4. When a Radiologist report is available it can be found in the REPORT section located on the right-hand portion of the screen. (You may need to expand the report tray on the right-hand portion of the screen by clicking the arrow)

5. \*Note for ED ONLY\* The Wet Read process will remain unaffected and wet reads should continue to be placed on the webpage.
